PROFESSIONAL SUMMARY

Computer Science Engineering student (2026) with hands-on experience in Python, Java, Flask, TensorFlow, MongoDB, and Azure. Developed AI-powered applications including recommendation systems, document automation tools, and assistive technologies. Certified in Microsoft Azure, Google Android Development, and Artificial Intelligence, seeking Software Engineer or AI/ML Engineer opportunities.

EDUCATION

B.Tech, Computer Science Engineering Manakula Vinayagar Institute of Technology, Puducherry CGPA: 7.08	2022 – 2026
HSC (12th Standard) N.A.Annaparaja Higher Secondary School, Rajapalayam, Tamil Nadu 83%	2021 – 2022
SSLC (10th Standard) P.A.C.M. Higher Secondary School, Rajapalayam, Tamil Nadu 71%	2019 – 2020

TECHNICAL SKILLS

Programming Languages Python, Java	Frameworks & Tools Flutter, Flask, TensorFlow, FastAPI
Domain Expertise Machine Learning, Artificial Intelligence, Computer Vision, Software Development	Databases & Platforms MongoDB, Microsoft Azure, Android (Compose)

INTERNSHIP EXPERIENCE

Infosys Springboard Virtual Internship Artificial Intelligence Intern (Virtual) - Developed an Emotion-Aware Music Recommendation System using Machine Learning. - Applied emotion classification techniques to generate personalized playlists. - Worked on model training, evaluation, and recommendation logic. - Skills: Python, Machine Learning, Artificial Intelligence, Data Preprocessing, Model Training, Model Evaluation, Recommendation Systems	09/2025
--	---------

PROJECTS

Smart Assistive Stick for Visually Impaired Individuals (Main Project) - Engineered an AI-powered voicebot enabling fully hands-free, voice-controlled operation of all device functions for visually impaired users. - Integrated TensorFlow Lite for real-time object detection, enabling low-latency on-device identification of obstacles and surroundings. - Implemented Google Maps API integration for real-time spoken turn-by-turn navigation, enhancing user mobility and independence. - Developed an SOS alert feature that transmits live GPS location and captured photos to designated contacts during emergencies.	02/2025
AI-Based Solar Panel Optimization - Developed a machine learning model to predict optimal sun position throughout the day for maximizing solar panel energy capture. - Applied data preprocessing and model evaluation techniques to train and validate prediction accuracy against real-world solar movement patterns.	01/2024

AI Chatbot for Document Extraction

08/2024

- Built an intelligent chatbot using Python and Flask to automate extraction of information from documents and respond to natural language queries.
- Designed the backend to parse, process, and index document content for fast, accurate query resolution, reducing manual effort and turnaround time.

CERTIFICATIONS

Infosys Virtual Internship 6.0 – Artificial Intelligence
Date: 2025-09

MongoDB Certificate – Introduction to MongoDB for Students
Date: 2024-07

Google Certificate – Android Basics with Compose
Date: 2023-09

Microsoft Certified – Azure Fundamentals
Date: 2023-05

NOTABLE ACHIEVEMENTS

- Won Second Prize in Paper Presentation at St. Joseph College of Engineering.
- Participated in a workshop on IAM in Cyber Security, Manakula Vinayagar Institute of Technology.

PERSONAL TRAITS

- Quick Learner
- Leadership
- Innovative Thinking
- Active Listener
